

Dear Trevor Dane:

Greetings from Gymnasium of Monastyrshany the Solotvyn Community Council, located in the picturesque region of Ivano-Frankivsk, Ukraine.

We would like to express our heartfelt gratitude for your warm letter, care and support! The package you sent brought immense joy to our children and teachers. The artwork created by the students of the Arkansas Academy of Arts has become a true source of inspiration. We deeply appreciate this gesture of kindness and feel the boundless power of goodwill.

Our gymnasium is an educational institution where 136 students study, including 20 who follow a homeschooling program and two children with special educational needs, who learn in an inclusive environment. We also have a preschool group attended by 18 children. Our team consists of 30 talented educators who work tirelessly to create the best conditions for learning and development.

We actively participate in various competitions, charity events, and activities, organizing fairs to support the Armed Forces of Ukraine. Our students study English and German, take part in a vocal ensemble, a tourism and local history club, and play volleyball on boys' and girls' teams.

We are thrilled about the opportunity to connect with you and your organization. Your initiative is incredibly valuable to our community, and we are excited about the prospect of continuing our communication, sharing experiences, and collaborating. We believe that this relationship will not only enrich our educational process but also strengthen the bonds of friendship between our countries.

We would love to learn more about your activities and share stories from our gymnasium. We sincerely hope for further cooperation and joint projects that will benefit children and educators on both sides,

Once again, thank you for your care and sincerity. Your hugs and support warm our hearts, even across thousands of miles.

With best regards,

Bohdan Dmytrash

Principal Gymnasium of Monastyrshany Solotvyn Community Council, Ivano-Frankivsk Region, Ukraine
